

# Surveillance Update

N.C. Tobacco Prevention and Control Branch

2005

## Tobacco Free Indoor Stadiums: 2004 N.C. Behavioral Risk Factor Surveillance System

Percentage of N.C. adults who support tobacco free indoor stadiums, by gender: N.C. BRFSS, 2004

Percentage of N.C. adults who support tobacco free indoor stadiums, by age group: N.C. BRFSS, 2004

Percentage of N.C. adults who support tobacco free indoor stadiums, by educational attainment: N.C. BRFSS, 2004

Percentage of N.C. adults who support tobacco free indoor stadiums, by income: N.C. BRFSS, 2004

Weighted to provide estimates representative of the adult non-institutionalized population; Persons aged 19 years and older who reported that tobacco use should not be allowed at all in indoor stadiums. Specific data on 95% confidence intervals is at the N.C. BRFSS website.

The N.C. Behavioral Risk Factor Surveillance System (N.C. BRFSS) provides a critical source of public health data for understanding the scope of the tobacco problem and measuring progress toward overall goals. N.C. BRFSS is a comprehensive telephone survey of adults ages of 18 and older. The sample size for the 2004 N.C. BRFSS was 15,052. Every year a core set of tobacco-related questions are asked. In addition, tobacco modules on topics such as other tobacco products and counseling can be added. In 2004, 34 tobacco related questions were asked assessing current smoking status to support for increasing the cigarette excise tax. The sampling scheme has been designed to produce estimates for local levels (22 counties and 13 regions) and for special populations such as Native Americans and Spanish-speaking and English-speaking Hispanics. Caution should be used in interpreting results when only a small number of respondents have answered the question. See the N.C. BRFSS website for more information and specific details on item responses: [www.schs.state.nc.us/SCHS/BRFSS/](http://www.schs.state.nc.us/SCHS/BRFSS/)
