

SURVEILLANCE UPDATE

North Carolina Tobacco Prevention and Control Branch / April 2006

Secondhand Smoke Exposure in Rooms

Percentage of N.C. middle and high school students who report having been in a room with someone smoking a cigarette within the past 7 days, by gender; N.C. YTS, 2005

Percentage of N.C. middle and high school students who report having been in a room with someone smoking a cigarette within the past 7 days, by grade level; N.C. YTS, 2005

Percentage of N.C. middle and high school students who report having been in a room with someone smoking a cigarette within the past 7 days, by race/ethnicity; N.C. YTS, 2005

Percentage of N.C. middle and high school students susceptible to start smoking, by grade level; N.C. YTS, 2005

Weighted to provide estimates representative of the public middle and high school student population; Persons having been in a room with someone smoking a cigarette within the past 7 days. Specific data on 95% confidence intervals is at the N.C. YTS website.

*Caution when interpreting. Results based on small sample size.

The N.C. Youth Tobacco Survey (N.C. YTS) provides a critical source of public health data for understanding the scope of the tobacco problem and measuring progress toward overall goals among youth. N.C. 2005 YTS is a comprehensive statewide representative sample of more than 6,000 middle and high school students. Every other year a core set of CDC tobacco-related questions are asked. In addition, states add questions related to local program factors. In 2005, TPCB together with the Health and Wellness Trust Fund added questions regarding media, community participation and secondhand smoking attitudes. The sampling scheme is now intended to generate significant numbers for regional data (Mountains, Piedmont and Coast). Caution should be used in interpreting results when only a small number of respondents have answered the question. See the N.C. Tobacco Prevention and Control Branch website for more information.
