

SURVEILLANCE UPDATE

North Carolina Tobacco Prevention and Control Branch -- March 2010

2009 N.C. Youth Tobacco Survey: Current Tobacco Use

Percentage of N.C. middle and high school students who report current tobacco use, by gender: N.C. YTS, 2009

Percentage of N.C. middle and high school students who report current tobacco use, by grade level: N.C. YTS, 2009

Percentage of N.C. middle and high school students who report current tobacco use, by race/ethnicity: N.C. YTS, 2009

Percentage of N.C. middle and high school students who report never tobacco use, by gender: N.C. YTS, 2009

Weighted to provide estimates representative of the public middle and high school student population; Students reporting having used a tobacco product in the past 30 days. Never tobacco users reporting having never used tobacco in lifetime. Specific data on 95% confidence intervals and regional definitions are at the N.C. YTS website.

*Use caution when interpreting. Results based on small sample size.

The N.C. Youth Tobacco Survey (N.C. YTS) provides a critical source of public health data for understanding the scope of the tobacco problem and measuring progress toward overall goals among youth. N.C. 2007 YTS is a comprehensive statewide representative sample of more than 7,100 middle and high school students. Every other year a core set of CDC tobacco-related questions are asked. In addition, states add questions related to local program factors. In 2007, TPCB together with the Health and Wellness Trust Fund added questions regarding media, community participation and secondhand smoking attitudes. The sampling scheme is now intended to generate significant numbers for regional data (West, Central and East). Caution should be used in interpreting results when only a small number of respondents have answered the question. See the N.C. Tobacco Prevention and Control Branch website for more information.
