

SURVEILLANCE UPDATE

North Carolina Tobacco Prevention and Control Branch / March 2010

Middle School Weekly Secondhand Smoke Exposure By Region

Percentage of N.C. middle school students who were exposed to secondhand smoke within the past 7 days, by gender and region: N.C. YTS, 2009

Percentage of N.C. middle school students who were exposed to secondhand smoke within the past 7 days, by grade level and region: N.C. YTS, 2009

Percentage of N.C. middle school students who were exposed to secondhand smoke within the past 7 days, by race/ethnicity and region: N.C. YTS, 2009

Percentage of N.C. middle school students susceptible to start smoking, by grade level and region: N.C. YTS, 2009

Weighted to provide estimates representative of the public middle school student population; Persons reported being in the same room or in a car with someone smoking in the past 7 days by region. Specific data on 95% confidence intervals and regional definitions is at the N.C. YTS website.

*Use caution when interpreting. Results based on small sample size.

The N.C. Youth Tobacco Survey (N.C. YTS) provides a critical source of public health data for understanding the scope of the tobacco problem and measuring progress toward overall goals among youth. N.C. 2009 YTS is a comprehensive statewide representative sample of more than 7,100 middle and high school students. Every other year a core set of CDC tobacco-related questions are asked. In addition, states add questions related to local program factors. In 2009, TPCB together with the Health and Wellness Trust Fund added questions regarding media, community participation and secondhand smoking attitudes. The sampling scheme is now intended to generate significant numbers for regional data (West, Central and East). Caution should be used in interpreting results when only a small number of respondents have answered the question. See the N.C. Tobacco Prevention and Control Branch website for more information.
