TEACHERS AND PARENTS:
That USB Stick Might Be an *E*-cigarette

Some e-cigarettes don’t look like tobacco products, so some kids use them unnoticed in schools, including in classrooms and bathrooms.

E-cigarettes are the most commonly used tobacco product among U.S. middle and high school students.

An increasingly popular e-cigarette, called JUUL, is shaped like a USB flash drive.

JUUL delivers a high dose of nicotine. Nicotine is highly addictive and can harm adolescent brain development.

TOBACCO PRODUCT USE IN ANY FORM, INCLUDING E-CIGARETTES, IS UNSAFE FOR YOUTH.
